Academic Projects

Title : Bank Management System

Description : A Bank Management System is software that automates banking operations like account management, transactions, and fund transfers. It allows customers to deposit, withdraw, and transfer money while enabling bank staff to track transactions and generate reports. The system ensures security, accuracy, and efficiency in banking processes.

Title : Online PMS Portal

Description : A Payroll Management System automates salary calculations, tax deductions, and attendance-based payroll processing. It helps admins manage employee salaries, generate payslips, and store past payroll records efficiently. The system ensures accuracy, compliance, and secure financial transactions.

Title : Electronic selling E-Commerce website(Front End)

Description : An Electronic Selling E-Commerce Frontend Website provides a user-friendly interface for customers to browse, search, and purchase products online. It includes features like product listings, shopping carts, secure checkout, and responsive design for seamless user experience.

Extra - Curricular Activities

- Successfully won GC in Hostel Competitions.
- Successfully organized and handled several cultural and sports Tournaments.
- Successfully organized online gaming tournaments.
